SUMMARY

As a dedicated software engineer with nearly 5 years of programming experience, I specialize in backend development, database management, and mobile application creation, with a proven track record in delivering web and mobile solutions. I run my own software development and consulting company, where I provide tailored services to clients. Additionally, I have experience as a software instructor, sharing my knowledge and expertise with aspiring developers. Proficient in Flutter/Dart, Node.js, React, Java, SQL, and Git, I bring high work discipline, a collaborative mindset, and a proactive approach to research and problem-solving, ensuring the success of every project I undertake.
